

NOTICE INVITING TENDER

Sample CPCL Procurement Tender - Tender A

Tender reference: CPCL/PROC/2026/001

Bid closing: 2026-09-30

Procurement category: Industrial procurement / synthetic demonstration

Purpose of this synthetic tender

This document is a controlled synthetic tender used to demonstrate an AI-assisted, tender-aware compliance workflow for SIH Problem Statement 26100. It is not an official CPCL or Government procurement notice.

The document contains tender-specific eligibility clauses so that the review application can extract them, attach evidence, and evaluate a bidder against the exact requirement.

Submission note

The bidder shall submit the statutory identifiers, declarations and financial evidence requested in Section III. The procurement officer remains the final decision-maker.

I. GENERAL TERMS

1. Scope of procurement

The procurement covers the supply and associated support services described in the tender schedule. The bidder shall provide all information requested in the tender.

1.1 Bidder identification

The legal entity named in the bid must be the same entity identified in its submitted statutory and financial documents.

1.2 Documentary consistency

Documents should be legible and internally consistent. Where the same field appears in more than one source, the procurement officer may inspect the underlying records.

1.3 Review basis

Eligibility is determined from the requirements of this tender and the bidder evidence available for review at bid time.

II. BID SUBMISSION

2. Required bid information

The bid submission should include statutory registration identifiers and the supporting documents requested under the pre-qualification criteria.

2.1 Statutory information

Provide GST registration, PAN and Udyam registration details where applicable. These identifiers may be checked against a verification source during review.

2.2 Financial information

Provide audited financial statements supporting the average annual turnover stated for the bidder. The evaluated financial value should be traceable to the relevant page of the audited record.

2.3 Declarations

Any self-declared value should be preserved as a declaration. Where the same field is present in audited evidence, the sources may be compared.

III. EVIDENCE AND VERIFICATION

3. Evidence requirements

Evidence must identify the bidder and contain enough source metadata for the procurement officer to inspect the underlying document and page.

3.1 Verification records

The prototype may attach mock verification records for GST, PAN, Udyam and financial evidence. These records represent the connector boundary and are not live government integrations.

3.2 Conflicting evidence

If two sources report different values for the same field, the difference should be surfaced for officer attention. A contradiction is not, by itself, a finding of fraud or collusion.

3.3 Human review

The procurement officer reviews the evidence-backed result and records any final disposition.

IV. REVIEW PROCEDURE

4. Tender-aware compliance review

The review maps clauses from this tender to structured requirements and compares those requirements against reusable bidder evidence.

4.1 Requirement mapping

Each mandatory clause should retain its source page, expected value or status, and the deterministic rule used for evaluation.

4.2 Financial evidence precedence

For the turnover requirement, the value used by the compliance rule should come from the audited or verified evidence rather than an unsupported declaration.

4.3 Exception handling

Missing or ambiguous evidence should remain visible as an exception or manual review state rather than being silently treated as a failure.

4.4 Prototype boundary

This synthetic tender is designed to exercise the core workflow; live government APIs and production authorization systems are outside this demonstration.

V. DOCUMENT CHECKLIST

5. Checklist for bidder submission

The following documents are expected for this synthetic scenario:

- GST registration record / identifier
- PAN record / identifier
- Udyam registration record / identifier
- Audited financial statements covering the stated financial period
- Self-declaration of financial information where submitted

The prototype can use these documents as evidence sources and attach verification records to the extracted fields.

SECTION III: PRE-QUALIFICATION CRITERIA (PQC)

3.1 Registration and statutory status

- 3.1.1 The bidder shall provide its GST registration number. The registration is required to have ACTIVE status at the time of review.
- 3.1.2 The bidder shall provide its PAN. The PAN is required to have VALID verification status.
- 3.1.3 The bidder shall provide its Udyam registration number where applicable. The registration is required to have ACTIVE status at the time of review.

3.2 Financial standing

- 3.2.1 Financial Standing - The bidder must demonstrate an average annual audited turnover of at least INR 5 Crore over the last three financial years, supported by audited financial statements.

Required evidence summary

Requirement	Expected evidence	Expected status / threshold
GST registration	GST registration identifier	ACTIVE
PAN	PAN identifier	VALID
Udyam registration	Udyam registration identifier	ACTIVE
Average annual turnover	Audited financial statements	At least INR 5 Crore

VI. GENERAL CONDITIONS

6. Officer review note

The compliance output is intended to support the procurement officer. Any result should be inspectable through the associated requirement, evidence, document/page, verification and rule.

Prototype case note: the synthetic bidder evidence contains a declared turnover of INR 6.2 Crore and an audited/verified turnover of INR 4.8 Crore. Tender-specific evaluation uses the verified figure and surfaces the discrepancy for review.
