Government Procurement Division

TENDER DOCUMENT

Supply, Installation and Five-Year Operations & Maintenance of Secure Campus Network Infrastructure for Government Training Institutes

Tender Reference	NPIA/NETSEC/2026/018
Estimated Contract Value	INR 9.80 Crore
Bidding System	Two-Bid System
Contract Period	90 days implementation + 5-year O&M;

IMPORTANT NOTICE

This document is a synthetic procurement document created for the Saanron SIH 2026 demonstration. It is modeled on the structure and information density of Indian GeM/public-sector tender documents and is not issued by any government authority.

SECTION I - TENDER INFORMATION SUMMARY

Field	Tender Information
Tender title	Supply, Installation and Five-Year Operations & Maintenance of Secure Campus Network Infrastructure for Government Training Institutes
Tender reference	NPIA/NETSEC/2026/018
Tender type	Open e-Tender (Domestic)
Bidding system	Two-bid: Technical + Financial
Evaluation basis	Techno-commercial qualification followed by financial evaluation
Estimated value	INR 9,80,00,000
Part quotation	Not permitted; bidder shall quote for the complete network package
Bid validity	120 days from bid opening
EMD	INR 19,60,000
Performance security	5% of contract value
Implementation period	90 calendar days
Operations & maintenance	5 years from final acceptance
Warranty	5 years for core network equipment
Language	English
Currency	Indian Rupees (INR)

Critical dates shall be those displayed on the procurement portal. Amendments and corrigenda issued before bid closing are part of the tender.

SECTION II - NOTICE INVITING TENDER

1. Invitation

NPIA invites bids for design finalization, supply, installation, integration, testing, commissioning and five-year operations and maintenance of secure network infrastructure across 24 government training institutes.

2. Pre-bid and Clarifications

- Clarification questions shall be submitted in the prescribed window.
- Technical responses to approved clarifications shall form part of the tender where issued as corrigenda.
- Bidders shall review the latest version of the tender before submitting a bid.

3. Bid Submission

- Technical and financial documents shall be submitted in the prescribed bid structure.
- Mandatory forms shall be completed and signed/digitally signed.
- All deviations from minimum technical parameters shall be declared explicitly.

4. Procuring Entity Rights

NPIA may accept or reject bids and may amend or cancel the procurement in accordance with the tender and applicable procurement conditions.

SECTION III - INSTRUCTIONS TO BIDDERS

Bid part	Contents
Technical Bid	Eligibility, qualification, OEM authorizations, cybersecurity/ISO documentation, technical compliance, implementation plan and O&M; capability.
Financial Bid	Complete price schedule covering equipment, installation and five-year O&M.;

General bidder obligations

- Bidder shall provide technically coherent equipment combinations and identify manufacturer/model for major line items.
- All network configurations shall comply with the required security baseline.
- The bidder shall maintain records necessary for support, asset tracking and audit of configuration changes.
- The bidder shall disclose any subcontracted installation or specialist support scope.

Conflict of interest and eligibility from specified countries shall be handled in accordance with the tender declarations and applicable portal conditions.

SECTION IV - PUBLIC PROCUREMENT POLICIES AND LOCAL CONTENT

1. Local Content Requirement

For the primary network equipment package, the synthetic tender establishes a minimum local content threshold of 40%. Bidders claiming higher local content shall provide supporting certification and identify the locations of domestic value addition.

Tier	Local content	Tender treatment
Tier 1 local supply	50% or more	Meets 40% mandatory criterion and may receive applicable policy treatment
Tier 2 local supply	40% to below 50%	Meets mandatory local-content criterion
Below threshold	Below 40%	Does not meet this mandatory criterion

2. MSE / Start-up

Applicable preference/exemption shall be considered only against documentary proof and the specific tender conditions. Experience and technical capability may remain mandatory.

SECTION V - ELIGIBILITY & QUALIFICATION CRITERIA

No.	Criterion	Documentary evidence
1	Bidder registered in India and operational for at least 3 years.	Incorporation/registration documents
2	Average annual audited turnover of at least INR 4.5 Crore during the last 3 completed financial years.	Audited financials + CA certificate
3	Positive net worth as on latest audited balance sheet.	CA-certified net worth statement
4	At least one similar network/cybersecurity deployment of value not less than INR 2.5 Crore completed within previous 5 years.	PO/WO + completion certificate
5	Valid and active GST registration.	GST certificate + verification
6	Valid PAN.	PAN document + verification
7	Active Udyam registration where claimed.	Udyam certificate + verification
8	Valid OEM authorization for firewall, switching and wireless equipment.	OEM authorization letter
9	ISO/IEC 27001 certification or documented information-security management certification accepted by the tender.	Valid certificate and scope
10	Local content of core equipment package shall be at least 40%.	OEM/local-content certificate
11	Bidder must not be blacklisted, banned or debarred.	Signed non-blacklisting declaration
12	Service centre/support capability within 300 km of each regional cluster.	Service facility declaration
13	Support engineer resources with relevant network/security certifications.	Staffing plan + certificates
14	Core equipment warranty/O&M; support for 5 years.	OEM/bidder undertaking

Mandatory criteria remain subject to documentary sufficiency and verification.

SECTION V-A - EVALUATION METHODOLOGY

Stage	Evaluation	State
1	Administrative completeness	Responsive / clarification / non-responsive
2	Qualification and statutory verification	Qualified / manual review / not qualified
3	Technical compliance against firewall, switching, wireless and management requirements	Technically qualified / deviation / review
4	Financial evaluation and award	Financially evaluated

Technical conformity claims must be supported by manufacturer literature, test reports, certificates or other evidence specified in the tender.

SECTION VI - SCOPE OF WORK

- Detailed site survey and finalization of implementation plan.
- Supply and installation of firewalls, managed switches, Wi-Fi 6 access points, racks, power conditioning and network management components.
- Configuration of VLANs, access controls, baseline firewall policies, logging and monitoring.
- Integration of network management system and event retention capability.
- Testing, commissioning and site acceptance.
- Five-year operations and maintenance including preventive maintenance, incident handling, configuration backup and reporting.
- As-built network documentation, device inventory and handover of administrator credentials under the contract procedure.
- Training for designated network administrators.

The bidder shall provide a single coherent implementation responsibility for the awarded package. Equipment interoperability is a bidder responsibility unless a dependency is explicitly stated by NPIA.

SECTION VII - IMPLEMENTATION SCHEDULE

Milestone	Target	Expected deliverable
M1	Day 15	Kickoff, site survey and detailed low-level design for all regional clusters
M2	Day 30	First 25% of sites installed and configured
M3	Day 60	At least 70% of sites commissioned
M4	Day 90	100% deployment, acceptance tests and documentation
O&M;	Month 4 onward	Five-year support, preventive maintenance and service reporting

Liquidated damages for bidder-attributable delay may be applied at 0.5% of the delayed portion per week, subject to the contract ceiling.

SECTION VIII - BILL OF QUANTITY / PRICE SCHEDULE

Item	Description	Qty	Unit
1	Next-generation firewall appliance - minimum required throughput as specified	24	Nos.
2	48-port managed Gigabit switch with 4 x 10G uplinks	48	Nos.
3	Wi-Fi 6 access point	240	Nos.
4	Network management / logging platform	24	Sites
5	Racks, UPS, patch panels and passive components	24	Sets
6	Installation, testing and commissioning	24	Sites
7	Training and handover documentation	24	Sites
8	Five-year O&M; support	24	Site-year

All line items are mandatory and shall be quoted as part of the complete scope.

SECTION IX - TECHNICAL SPECIFICATIONS: FIREWALL

Parameter	Minimum requirement
Firewall throughput	At least 5 Gbps under the specified test profile
Concurrent sessions	At least 1,000,000
Interfaces	Minimum 8 x 1G plus 2 x 10G capable interfaces
HA capability	Active/passive high-availability support
VPN	IPsec and SSL VPN support
Logging	Central logging/export capability
Authentication	RADIUS/LDAP integration support
Policy control	Application-aware policy and role/group-based controls
Support	Five years support / subscription as applicable to model

Exact model, datasheet and supported feature set shall be provided by the bidder. Marketing statements without technical source references may be treated as insufficient evidence.

SECTION IX-A - TECHNICAL SPECIFICATIONS: SWITCHING AND WIRELESS

Component	Minimum requirement
Managed switch	48 x 1G Ethernet ports + 4 x 10G uplink ports
Switch features	VLAN, STP/RSTP, ACLs, QoS, SNMPv3 and 802.1X support
Wi-Fi standard	IEEE 802.11ax / Wi-Fi 6
AP aggregate capacity	At least 1.2 Gbps
AP security	WPA2/WPA3 enterprise support
Central management	Controller/cloud management for all deployed APs
NMS/log retention	Minimum 12 months searchable network events for the tender deployment
Power	PoE support for access points
Environment	Equipment suitable for institutional indoor deployment conditions

The bidder shall identify any feature dependent on additional licenses and include those licenses for the full five-year O&M; term.

SECTION X - OPERATIONS, SLA AND SUPPORT

Service metric	Requirement
Network availability	Target 99.5% monthly service availability for managed network services, excluding approved maintenance windows
Critical incident acknowledgement	Within 30 minutes
Critical incident escalation	Within 1 hour to senior support
Critical resolution target	Within 4 hours remote where technically possible; otherwise dispatch plan
Preventive maintenance	At least quarterly review/maintenance cycle
Configuration backup	Automated periodic backup and retention for the managed estate
O&M; term	Five years from final acceptance

The bidder shall submit an escalation matrix and nominate primary/secondary support personnel for each regional cluster.

SECTION XI - INSPECTION, TESTING AND ACCEPTANCE

Test area	Acceptance evidence
Firewall performance	Throughput/session capability verified against approved test procedure
Switching	Port count, uplink, VLAN, ACL and management functions checked
Wireless	AP connectivity, security, coverage and management enrollment checked
Logging	Events generated, exported and retained for required period
Resilience	HA/failover behavior checked where supplied
Documentation	Asset inventory, IP plan, topology, configurations and support contacts submitted

Equipment not satisfying a mandatory specification shall be corrected or replaced by the bidder before acceptance. Acceptance does not waive the warranty or O&M; obligations.

SECTION XII - COMMERCIAL AND CONTRACT CONDITIONS

- Performance security: 5% of contract value.
- Payment shall be linked to supply, installation, acceptance and O&M; milestones.
- All required software subscriptions for the contracted service period shall be included in the bid price unless expressly excluded.
- The bidder shall maintain spares/repair arrangements appropriate to the service levels.
- Any subcontracting shall be approved by NPIA and shall not dilute the bidder's responsibility.

Indicative payment structure

Milestone	Indicative share
Equipment delivered and inspected	35%
Installation and configuration	30%
Site acceptance	20%
Stabilization / documentation	15%

Five-year O&M; charges shall be separately identifiable in the price schedule.

SECTION XIII - CERTIFICATES, DECLARATIONS AND FORMS

Form	Submission	Purpose
Form 1 - Bid Form	Mandatory	Covering bid
Form 2 - Bidder Information	Mandatory	Legal and contact information
Form 3 - Eligibility Declarations	Mandatory	Eligibility declarations
Form 4 - Technical Compliance & Deviations	Mandatory	Parameter-level technical response
Form 5 - Qualification Compliance	Mandatory	Qualification evidence map
Form 6 - Experience Statement	Mandatory	Similar project record
Form 7 - OEM Authorization	Mandatory	Manufacturer support authorization
Form 8 - Local Content Declaration	Mandatory	Local-content certification
Form 9 - Non-Blacklisting / Non-Debarment	Mandatory	Eligibility declaration
Form 10 - ISO Certificate Schedule	Mandatory	Security/quality certification details
Form 11 - O&M; Staffing and SLA Plan	Mandatory	Operational support capability
Form 12 - Bidder Checklist	Mandatory	Submission completeness

These forms are synthetic but intentionally resemble the structured qualification/compliance schedules present in large public-sector tenders.

ANNEXURE B - BIDDER EVIDENCE SCHEDULE

The bidder shall map each qualification and technical claim to an authoritative submission and page reference.

Evidence item	Minimum source	Bidder page reference
Audited turnover / CA certificate	Audited financial statements + certificate	_____
Net worth statement	Latest audited balance sheet + CA statement	_____
Similar network project	PO/WO + completion certificate	_____
GST/PAN/Udyam	Registration certificates	_____
OEM authorization	OEM letter for firewall/switch/wireless	_____
ISO/IEC 27001	Valid certificate + scope	_____
Local content	OEM/local-content certificate	_____
Firewall/switch/AP datasheets	Manufacturer datasheets/test evidence	_____
SLA/O&M; plan	Support plan + staffing schedule	_____
Non-blacklisting/debarment	Signed declaration	_____

For the Saanron demonstration, this page provides realistic source/document cross-references for AI extraction and evidence-chain navigation.

SECTION XIV - BIDDER CHECKLIST AND CROSS-REFERENCE INDEX

Requirement family	Primary tender source	Evidence / submission
Turnover	Section V, Criterion 2	Audited statements + CA certificate
Similar project experience	Section V, Criterion 4 + Form 6	PO + completion certificate
OEM authorization	Section V, Criterion 8 + Form 7	OEM authorization letter
ISO/IEC 27001	Section V, Criterion 9 + Form 10	Certificate + scope
Local content	Section IV + Section V, Criterion 10	Local-content certificate
Technical firewall	Section IX + Form 4	Datasheet/test evidence
Switching/wireless	Section IX-A + Form 4	Datasheet/test evidence
SLA/O&M;	Section X + Form 11	SLA/staffing plan
Blacklist/debarment	Section V, Criterion 11 + Form 9	Declaration

End of Tender B

All requirements are synthetic and intended to exercise Saanron document understanding, evidence linkage, deterministic compliance checks and officer review.
